Number of pages: 3

To: Dynamic Positioning Accredited Training Centres, DPTEG stakeholders

Referent to: OFFSHORE LOGBOOK

Subject: Error in the task sections

OFFSHORE LOGBOOK – ERRORS IN TASK SECTION

The Nautical Institute (NI) printed a new batch of Offshore logbooks in April 2015 and added the heading in each page to facilitate the filling of the tasks and signatures. This changed the pagination of the tasks and consequently moved some tasks from one page to another.

By doing this, some tasks were missed as per below:

Page 108
It is missing task 7.11.

Page 112
It is missing task 7.23.

Page 114
It is missing task 8.3.

Page 118
It is missing task 9.10.1.

In order to rectify the problem, the Nautical Institute:

a. Will email a pdf copy of the task sections with the missing tasks and explanation to all DPOs and training centres asking them to add the loose leaf pages into their logbooks.
b. Add a hard copy of the task sections with the missing tasks and explanation into all new logbooks that are in stock in NI warehouse and for future orders.
c. Allow these tasks to be undertaken at any time within the training standard; i.e. before or after the Simulator course, but before the Suitability sign off. So it will not affect the students that have already completed the task section.
d. These tasks however shall be completed within Phase B or D and match with the logged sea time (active time) as indicated in the task section.
e. Amend the IT system to accept these tasks in any order, but this exception will be done only for the logbook number range specified in item f below.
f. The logbook numbers that were affected by this error are in the range of 15OF0205001 and 15OF0210000

Kindly promulgate this information to your members.
The information will be also displayed in our website www.Alexisplatform.org

SECTION 7:
Demonstrate a satisfactory level of competence in all aspects of transferring the vessel from manual to DP control.

The following must be completed with vessel engines and thrusters running. It is recommended that the trainee DPO should practise on vessel’s in-built simulator if possible, as well as in Active mode.
